Workplace Inspection Checklist

The inclusion of WHS into the enableHR suite reinforces its position as Australia's leading web based HR resource tool. Backed by FCB Law and FCB HR, enableHR continues to enable better HR management to its 6,000 + clients.

enabling better WHS management!

enableHR is proud to announce the launch of its Workplace Health and Safety (WHS) system.

The WHS system integrates with enableHR's award winning employee and contractor management modules, enabling even better HR management for any sized business.

Hazard Management

Dedicated hazard management allows the tracking and recording of individual hazards within the workplace. Classify hazards by type, risk, location and status. Alerts and reminders engage key stakeholders to ensure hazards are identified and rectified. Document and activity management support and protect.

Incident and Accident Management

Record emergency, first aid and 'near miss' incidents and accidents using integrated workflows and checklists. Be guided through the critical steps when managing an incident or accident, accessing relevant template documents and guides. Record actions within employee or 'other person' profiles, including key documents and supporting actions.

Consultations

The WHS legislation introduces more stringent consultation requirements for workers under your care. Be guided through the key steps in consultation, recording actions, notes, outcomes and reminders in individual electronic 'consultation' profiles.

Other enableHR Modules

Employee Management

- Q&A template contracts
- Q&A template letters and policies
- Lifecycle management workflows
- Candidate and employee profiles
- Email alerts and reminders
- Integration with payroll

Contractor Management

- Q&A agreement templates
